

Fig. 9A shows output XML in XEDI format relating to a header.

A2
Concl.

Fig. 9B shows output XML in XEDI format relating to N1 loops.

Fig. 9C shows how Figures 9C-1 and 9C-2 fit together. In the rest of the specification, any reference to the contents of Fig. 9C will actually be referring to the contents of Figures 9C-1 and 9C-2.

Figs. 9C-1 and 9C-2 show output XML in XEDI format relating to PO1 loops.--

REMARKS

During preparation of the formal drawings, it turned out that Figures 6 and 9C could not fit on a single page. As a result, these figures were redone, and split onto two pages. Fig. 6 became Fig. 6A and 6B, with Figure 6 showing how the two fit together. Similarly, Figure 9C became Fig. 9C-1 and 9C-2, with Fig. 9 showing how the two fit together. In this amendment, the text of the specification has been changed to accommodate the new figures. At

the same time, separate descriptions had to be added to the list of figures corresponding to 8C, 9A, and 9B, since these had been lumped in with Fig. 9C. No new matter has been added.
